

Company Bio

Pixm's mission is to make phishing attacks obsolete. Pixm brings to you an award-winning technology backed by well-known cybersecurity investors and former Intelligence Community members.

It has its pedigree rooted in top accelerators such as GSVLabs, MassChallenge, and Highland Capital's Cybersecurity Factory. 93% of all data breaches today start with a phishing attack.

Two years ago, that was 91%. Pixm is rethinking phishing protection with a fresh ground-up perspective and bringing cutting-edge computer vision technology directly in the hands of everyday users to protect from the #1 attack vector favored by hackers.

Founder Bio

Chris Cleveland, Founder & CEO

Scientist, Engineer, Entrepreneur. Chris triple majored in physics, applied math, and engineering at Princeton. After publishing his thesis in AIP Advances, he enrolled in Columbia graduate school in CS where he went on to win the CVC High-Tech Venture Competition cash prize, which he used to start Pixm. He now wakes up excited to stop phishing breaches.
